Good morning Jamie. This week is busy for me, but my schedule is wide open next Monday (7/14) and Thursday (7/17). Is there anyone else you'd like me to invite to the discussion?

You're probably aware of this but here's a brief summary. Back in the mid-1980s the MPCA entered into an enforcement agreement with General Mills and General Mills has been pumping and treating the groundwater from the site. It's my understanding that MPCA is currently working with General Mills to address vapor intrusion issues. U.S. EPA has not had an active role in the project since it's part of deferral agreement between U.S. EPA and MPCA, however, U.S. EPA provides advice and support to MPCA when requested.

Tom

**Subject:** Como Site

Hi Tom:

I handle environmental issues in Minnesota for Congressman Keith Ellison. I'd like to find a time in the next couple of weeks to discuss EPA's role at the General Mills site in the Como neighborhood of Minneapolis. Can you let me know when would be convenient?

Regards,  
Jamie
